

Spring Makes Me Tired

To many people Spring and its duties mean an aching head, tired limbs and throbbing nerves. Just as the milder weather comes, the strength begins to wane and "That Tired Feeling" is the complaint of all.

The reason for this condition is found in the deficient quality of the blood. During the winter, owing to various causes, the blood becomes loaded with impurities and loses its richness and vitality. Consequently, as soon as the bracing effect of cold air is lost, there is languor and lack of energy. The cure will be found in purifying and enriching the blood.

Hood's Sarsaparilla is the greatest and best spring medicine because it is the greatest and best blood purifier. It overcomes That Tired Feeling be-

Prominently in the Public Eye Today.

A Walking Fern.

There is a fern which, by its peculiar habit of growth, may almost justly lay claim to the popular name of the "Walking Fern."

The fronds arch over, and the fine, slender points coming in contact with the soil take root; new growth again proceeds from the latter, which in its turn roots also, so that the locale of the plant is continually moving forward and suggesting the idea of walking.

This peculiar fern is quite hardy and succeeds well in a soil of peat, leaf-mould and sand, in a shady position which is moist in summer and fairly dry in winter. The fronds are heart-shaped, bright green in color, six to twelve inches long.

PISO'S CURE FOR CONSUMPTION

Cures where all else fails. Cures where all else fails. Cures where all else fails. Cures where all else fails.

FLORIDA BRIEFS.

ITEMS OF INTEREST GATHERED AT RANDOM.

News from all Parts of the State Summarized.

The governor has appointed J. M. Lisenby, of Cedar Key, to be notary public for the state at large.

At the fall term, 1894, of the circuit court for Pasco county, Henry Morris, Lewis Raymond, William Mitchell and Zellena McHurt were convicted of murder in the first degree, and sentenced to be hanged. Upon a review of the case by the state board of pardons, the past week, Morris was pardoned, and the sentences of the other three commuted to life imprisonment.

The bill incorporating the Florida Jockey Club and State Fair Association which the house of representatives relegated to oblivion had behind it such notable men of millions as the Goulds, the Dwyers, the Keenes and the Belmonts and its passage would have yearly brought her a class of gilded youths and fine de seide maidens who now put in their time of a winter among the myrtles and lantanas, the olives and oranges, of the sunny Riviera.

Captain Robert Ivey has successfully launched his new boat, that will stem the current of the Suwannee under the name of the C. D. Owens. The boat is considerably the largest and, it is thought, will be the most rapid boat on the river. It is 150 feet long with 21 feet beam and a hold of 5 feet; tonnage, 300. It will be propelled by a stern wheel and when completed will have twenty-five state rooms. The boat will probably make her first trip on the river about June 1, when she will be scheduled to run from Cedar Key to Ellaville.

The orange growers of the state are more sanguine during the last few days than they have been since the February freeze. The rains of the latter part of April have done the work of a world of good, and groves that were thought to be dead beyond all redemption are sprouting out and the shoots growing rapidly. Railroad men estimate that those trees south of a line drawn east and through the state at Sanford, will produce some kind of a crop this year, and that this crop will be all the way from a quarter to a half million boxes. The next year's crop they put down at 1,500,000 boxes, the next at 3,000,000, and the year after at anti-freeze figures.

Superintendent of education Sheats has issued two circulars which are of general interest. The first is as follows: "To County Superintendents: Inclosed you will find notice of apportionment of the one-half mill tax to your county for the present year. The amount apportioned is \$1,081,183 less than last year; due to failure in collections for 1894. Each county, therefore, receives less than it would otherwise have. The falling off in some counties is also due to the fact that the present apportionment is made on the basis of average attendance, and not on school population as formerly." The second circular gives information in regard to the May examinations and grading committees.

A Fine Vegetable Crop. Capt. J. H. Stephens, contracting agent of the Plant System, who recently made a visit down the east coast, reports an encouraging condition of affairs. The people have raised the best vegetable crop in point of quality and quantity ever seen in the state; there are prospects for a fair pineapple crop; the orange trees are showing remarkably encouraging signs of vitality, and the people, on the whole, are not worrying about something to eat. "The bean crop along the east coast," says the captain, "has almost all been shipped. Prices have not been high, but, nevertheless, a profit has been made."

Hold the Fort. Against a billious attack by calling to your aid that puissant ally, Hostetter's Stomach Bitters. The foe will then be driven back utterly defeated. Dyspepsia, sick headache, malaria, kidney, nervous and rheumatic trouble, and constipation yield to the action of this most beneficent of remedies. Take it regularly and you will soon experience its good effects.

It is better to be a pure and truthful man in race than a hypocrite in broadcloth.

When Traveling. Whether on pleasure bent, or business, taken every trip a bottle of Syrup of Figs, as it acts most pleasantly and effectively on the kidneys, liver and bowels, preventing fevers, headaches and other forms of sickness. For sale in 50 cents and \$1 bottles by all leading druggists.

What we may call hindrances sometimes open the way to success.

Dr. Kilmer's SWAMP-ROOT cures all Kidney and Bladder troubles. Painful and Urinary Diseases. Laboratory Binghamton, N. Y.

Trials are very often essential in building a character.

Providence, R. I. Please forward six boxes of Tetterine, C. O. D. I think it strange that it is not sold here in New England, as it is the best cure for Tetterine, Ring Worm and all eruptions of the skin I ever saw. I got a box from an old friend, and I gave part of it to a young lady who had tried almost everything to remove Pimples and an eruption from her face. Two applications of Tetterine completely cured her. I know also a gentleman whose body was covered with Eczema—two boxes of Tetterine cured him completely, and now his skin is smooth as a baby's. P. O. Hamilton, with Silver Springs, Binghamton, Co. Sent by mail for 50c. in stamps. J. T. Shuptrine, Savannah, Ga.

Pain's Cure for Consumption is an A. No. 1 Asthma medicine. W. R. Williams, Anthon, Ills., April 11, 1894.

If afflicted with sore-eyes use Dr. Isaac Thompson's Eye-water. Druggists sell at 25c per bottle.

no means likely to go unrepresented.

Many Resignations.

Those who suppose Florida has not some people above the ambition for mere office-holding should have an opportunity to examine a statement on file at the postoffice department at Washington, showing the number of postmasters in Florida who have resigned in the present year. This year of 1895 is young yet, only a little more than four months of it having passed, and yet in that time no less than fifty postmasters in the state of Florida have tendered their resignations. At this rate the resignations for the year will number 150 or more. The salaries of those who have resigned during the year amount to a total of nearly \$4,000 per annum. Seldom a week passes in Florida in which there are not several resignations sent in. Some of these are accompanied by communications stating the reason for resigning, some are not. In some cases prospective removal from the locality is the cause of the desire to abandon the service of the government; sometimes the complaint is made that the office does not pay enough to make it an object; sometimes the business of the person has grown so as to require all his time and prevent him from giving his attention to the office. Occasionally a lady postmistress blushing admits, when she sends in her resignation, that she is going to get married and will not have time to attend to Uncle Sam's business hereafter. Sometimes the resignation is handed in because the party knows that the department wants it and will remove him or her if he or she doesn't resign.

Hurricane Warnings.

The department of agriculture has decided on a new plan for the dissemination of hurricane warnings. H. C. Dunwoody, in charge of the forecast division, in a letter to the officer in charge of the weather bureau in Jacksonville, says:

"Referring to the plan heretofore suggested in instruction from this office for the dissemination of warnings of hurricanes by means of steam vessels with hurricane flags flying and whistles sounding, I am instructed by the chief of the bureau to inform you that it is desirable, if practicable, to put this plan in operation during the coming season, if occasion should require. The service of government vessels, as previously provided for, will, of course, be secured whenever possible, but they are few in number, and may not happen to be lying at the point where they can be available. You will therefore ascertain, and report as early as possible, if there are any islands or coast regions in your vicinity beyond the reach of telegraph communication, where there are valuable interests that would be served by this method."

"It is desired, in the event of the plan being perfected, that definite arrangements be made beforehand with some particular vessel or vessels, for the performance of this service in case it is needed. You will also consult with the vessel men and ascertain if it would be feasible to employ this method at night by using a suitable whistle signal as a warning. The region which it is desired your report should cover is the east coast of Florida, as far South as Cape Canaveral."

All of the east coast is now reached by telegraph, but there is but one line, and in almost every hurricane communication is very soon destroyed. The east bank of the St. Johns river, however, contains many valuable orange groves and other valuable interests, that have no telegraphic communication, which could easily be reached by steamer. No doubt these interested would highly appreciate the service, provided it embraced cold wave warnings as well as hurricane warnings.

RIOTOUS STRIKERS.

Poles and Bohemians Attack the Illinois Steel Company's Works.

Twelve hundred men employed in the blast furnace department of the Illinois Steel company, Monday morning, Chicago, quit work Tuesday morning. Two furnaces are shut down as a result, and the strikers expect that they have sympathizers enough to spread the disaffection to other departments. It is likely that the four other furnaces may be compelled to suspend. The strikers claim that not enough men are employed in the blast furnace work to divide the labor fairly, and that they are not receiving wages that will enable them to live. Two years ago, the men claim, they were being paid \$2.10 a day for work that they now do in twelve hours for \$1.60.

Tuesday night 700 of the strikers attacked the gate to the company's enclosure at Eighty-sixth and Green Bay streets, and in a struggle with the police several were injured. The police, although greatly outnumbered, used their clubs to good purpose, and notwithstanding the onslaught of the infuriated men, they more than held their own. In a short time they had scattered the crowd. The police sent for reinforcements and in half an hour 100 officers were on the scene. Twenty-eight of the ring-leaders, mostly Bohemians and Poles, were placed under arrest. In both scrimmages eight policemen and a number of strikers were hurt, but none seriously. A heavy guard has been placed about the works of the steel company and detachments of police placed on duty in every portion of the town.

Garment Workers Winning.

Success Seems Certain and Many are Returning to Work.

A Philadelphia special says: It is evident that the success of the garment workers in the present strike will be universal and that the abolition of "sweat shops" will be the outcome. Wednesday morning 400 more hands returned to work, ten contractors having conceded their demands, and the Knights of Labor leaders declare that in a short time six hundred additional workers will be employed. Thus far forty-eight contractors have given in to the strikers, but there are still 1,500 men and women on strike.

Increasing Their Sea Forces.

Russia, France and Germany, it is announced, are about to increase their naval forces in the China sea.

KNOCKED OUT.

DECISION ON SOUTH CAROLINA'S REGISTRATION LAW.

The Dispensary Statute Also Declared Null and Void.

The decision in the registration case of Mills vs. Green was read by Judge Goff in the United States circuit court at Columbia, S. C. It was very lengthy. It holds that the court has jurisdiction; that no official, state or national, is above the law; that, as to the constitutionality of the registration, citizens of the state are citizens of the United States, residing in that state, and that Mills is such, and that the plaintiff's claims are sustained by the decisions of the court; that the registration law's requirement of certificates is not warranted by law; that the registration law is unconstitutional in such requirements; that the constitutional convention act does not cure defects; that the whole laws are unconstitutional; that the proceeding is not against the state; that this court is a court of the state of South Carolina as well as of the United States. Judge Goff, therefore, issues a permanent injunction.

DISPENSARY LAW ALSO DOWNED.

Judge Simonon, after the disturbance caused by Judge Goff's decision had been quelled, read the decision in the dispensary case of Donald vs. The State Constables, declaring that the court has jurisdiction, that the provisions of the dispensary law are in violation of the United States interstate commerce law and that the injunction issue as prayed for.

OTHER CASES THROWN OUT.

Judge Simonon then read a decision in the case of Dunbar vs. the constables in the dispensary matter, declaring that the prayer for the injunction is refused, not being properly in court. He then read the decision in the contempt case vs. Mixson, state commissioner, saying that in view of the solemn denials of Mixson, he had purged himself, the same being true as to the constables.

Pope and Caldwell's case on the registration law was dismissed, not being properly in court.

EFFECT OF THE DECISION.

The dispensary system has gone glimmering, if the decision rendered by Judge Simonon, of the United States court runs the gauntlet of the United States supreme court, and is sustained. Again, United States Judge Goff has knocked the registration law of the state into a cocked hat and the effect of the decision is a free and open ballot in the coming election for delegates to the constitutional convention, something that works complete revolution in the state. The court room was jammed, packed to its utmost capacity, during the reading of the decision.

The cases brought by Messrs. Caldwell and Pope were dismissed and the decisions were rendered on Messrs. Bryan and Douglas's cases.

COMMISSIONER MIXSON RETRACTS.

State Liquor Commissioner Mixson and Constables Davis and Lafer were before Judge Goff on the charge of contempt Tuesday afternoon. The commissioner, in submitting his return, practically said that he did not mean anything he said in his circular to the constables, telling them to be more vigilant than ever in seizing liquor and disclaiming any intent in issuing the circular of disobeying the order of the court. The other returns were even more retractive, and in strange contrast with the talk of state's rights and the announcement that no heed would be given the order on the part of the dispensary officials last week.

IRON WORKERS COMBINING.

An Effort for Better Wages and Fairer Competition for Manufacturers.

The Amalgamated Association of Tin, Iron and Steel Workers and the Merchant Bar Iron Manufacturers' National Association have entered into a combination to secure for their iron workers of the country better rates of wages, and for the manufacturers fair competitive conditions against the mill operators of the Pittsburgh, Pa., district, who have been working their employees at low wages.

An association of manufacturers has been formed principally outside the Pittsburgh district, to secure remunerative prices for iron products, and incidentally to give the workmen better wages than are now paid, which are admittedly too low.

At the Youngstown conference between the amalgamated association and the valley iron manufacturers, an agreement was entered into by the Merchant Bar Iron Association to advance the present puddling scale ten per cent, provided the non-union and under scale mills of Pittsburgh could be forced to pay the same price.

The strike in six mills of Pittsburgh at the present time is the result of this agreement. The Pittsburgh puddlers are not only striking for present scale rates, but, if successful, will make it possible for all the iron workers in the country to secure an advance of ten per cent on the \$4.00 puddling rate.

The manufacturers may be willing to grant a much higher advance if they can secure a uniformity of labor cost throughout the country.

The Cleveland convention will probably propose a puddling rate of \$4.55 per ton and possibly \$5.00. The finishers are to be advanced also, but not in proportion to the puddlers. Should the plan succeed, upward of 5,000 iron workers will be benefited.

CLEVELAND COMPLIMENTED.

He Reciprocated With a Check for Five Hundred Dollars.

Three weeks ago there were born to Mr. and Mrs. Albert Zerkles, living near Decatur, Ind., three girl babies. The parents named the children, Ruth, Esther and Frances. A neighbor of the Zerkles wrote President Cleveland informing him of the facts and a day or two ago the father of the children received a draft from the president for \$500, to be used for the education of the girls should they live.

A Wonderful Sensitive Plant.

An incident related by the author of "The Pearl of India," in his description of the flora of Ceylon, is almost uncanny, although we are assured that it is true. It is about the mimosa, or sensitive plant, and makes one almost wonder whether the plant has intelligence.

The doctor, one of the characters of the book, while sitting with the family on the broad piazza, which formed the front of the bungalow of a coffee plantation, recognized a thrifty sensitive plant, and it was made the subject of remark. He called his young daughter 11 years from the house. "Lena," said he, "go and kiss the mimosa."

The child did so, laughing gleefully, and came away. The plant gave no token of shrinking from contact with the pretty child.

"Now," said the host, "will you touch the plant?"

Rising to do so, we approached it with one hand extended, and before it had come fairly in contact the nearest sprig and leaves withered visibly.

"The plant knows the child," said the doctor; "but you are a stranger."

An Electric Swindle.

A French fakir has lately been doing a "land office" business in selling rat powder that, while perfectly harmless, was sudden death to the rats. In order to convince the skeptical the man first of all powdered a slice of bread with the stuff and ate a part of it. Then he put the balance under a glass case, where a rat was in captivity. The rat went to eat the bread and instantly fell dead. At half a franc a box the powder went off like hot-cakes and the lucky proprietor was in a fair way to make his fortune. But the French police, very active in detecting and punishing fraud, "got onto the game" and found the rat powder was nothing but ordinary sugar. They also discovered that the glass sample case was connected with a powerful electric battery, and the moment the rat touched the bread the current was turned on and his death was instantaneous.

Rats to be thoroughly cleansed from dirt should be beaten with that useful little article known as a whipper, which forces from them all articles of dust.

AFTER THIRTY YEARS.

THE BUCKEYE STATE CONTRIBUTES THE STORY OF A VETERAN'S SEARCH.

How Fred Taylor, a Member of the Class of 1861, Found What He Has Sought Since the War Closed.

(From the Atlantic, Ohio, Dragon.)

Mr. Fred Taylor was born and brought up near Elmira, N. Y., and from there enlisted in the 189th regiment, N. Y. V. L., with which he went through the war and saw much hard service. Owing to exposure and hardships during the service, Mr. Taylor contracted chronic diarrhea, from which he has suffered now over thirty years, with absolutely no help from physicians. By nature he was a wonderfully vigorous man. Had he not been, his disease and the experience of the doctors had killed him long ago. Landanum was the only thing which afforded him relief. He had terrible headaches, his nerves were shattered, he could not sleep, an hour a day on an average, and he was reduced to a skeleton. A year ago he and his wife sought relief in a change of climate and removed to Geneva, Ohio; but the change in health came not. Finally, on the recommendation of F. J. Hoffer, the leading druggist of Geneva, Ohio, he bought a box of Pink Pills for Pale People, and he has the most confident confidence in them. He has regained full control of his nerves and sleep as well as his health. His color is coming back to his cheeks, his appetite is steady, and he has the strength rapidly. He is now able to do considerable outdoor work.

As he concluded narrating his sufferings, experience and cure to a *Revere* reporter, Mrs. Taylor, who has been his faithful helper these many years, said she wished to add her testimony in favor of Pink Pills. "To the pills alone is due the credit of raising Mr. Taylor from a helpless invalid to the man he is to-day," said Mrs. Taylor. Both Mr. and Mrs. Taylor could find words to express the gratitude they feel or recommend too highly Pink Pills to suffering humanity. Any inquirer addressed to them at Geneva, O., regarding Mr. Taylor's case, they will cheerfully answer, as they are anxious that the whole world should know what Pink Pills have done for him and that suffering humanity may be benefited thereby.

Dr. Williams' Pink Pills contain all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are for sale by all druggists, or may be had by mail from Dr. Williams' Medicine Company, 200 North Third St., N. Y., for 50 cents per box or six boxes for \$2.50.

Highest of all in Leavening Power.—Latest U. S. Gov't Report

Royal Baking Powder

ABSOLUTELY PURE

A Lease for 9900 Years.

Gem Bearing Plants.

A curious lease is on record in the county court at Hebron, Ct. It is one of the longest leases on record, and for one of the oldest considerations. According to the docket the "Society of the Propagation of the Gospel of Foreign Parts" (the great English Missionary Society) leases thirty acres of land to one S. W. Chase and his heirs for the term of 9999 years. The tenure is held on condition that the said "Chase, or his heirs, shall pay to John Sutton and J. T. Peters, church wardens of said society, or their successors in office, one grain of pure silver, or other silver, gold equivalent (if so demanded), on St. John's day of each ensuing year." There are many curious and whimsical tenures held in Great Britain, France and Germany, but it is doubtful if the records of America can produce anything equal to this long-lived land lease, which will not terminate until after the lapse of 9999 years from the 25th of this month.

May Week Celebration; Savannah, Ga., May 12-16, 1895.

It has been decided to hold a May week celebration in Savannah during the third week in May, for which a very interesting programme has been arranged, including grand carnival, large military parade and display, Tuxedo day with sham and naval battle, etc. It is also expected that several large war vessels will be present.

The old reliable Central railroad of Georgia will run trip tickets May 12th to 16th, limited returning May 18th, from all points in Georgia, and from Montgomery, Ala., and intermediate points, to Savannah, at the rate of one fare for the round trip.

For military companies in uniform, twenty or more traveling in a body on one ticket from stations within 100 miles of Savannah and from Montgomery, Ala., and intermediate points, rate of 1 cent per mile in each direction is authorized. At these very low rates every one will have an opportunity of making the trip to Savannah.

For further information, rates, schedules, etc., apply to any ticket agent of the Central railroad system or S. R. Webb, traveling passenger agent, 10 Wall street, Atlanta, Ga.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, etc., a bottle.

Parker's Ginger Tonic is Popular for good work. Suffering, nervous women find nothing so soothing and reviving.

HAMMAR PAINT CO.

COST LESS THAN CHEAP PAINT OR WHITE LEAD.

Guaranteed 5 years.

HAMMAR PAINTS

PURE Linseed Oil ONLY makes any Paint or Lead durable and bright. If the oil in your paint is PURE, your paint must be good. It is absolutely necessary to add an addition of PURE Linseed Oil to a gallon of Hammer Paint to make it ready for application. Buy your Oil FRESH from your dealer's barrel and KNOW YOUR Paint is made of pure Oil and therefore the best. It will cost you MUCH LESS than Linseed Paint in cans and is VASTLY BETTER.

St. Louis, Mo.

CONSUMPTION

can, without doubt, be cured in its early stages. It is a battle from the start, but with the right kind of weapons properly used it can be overcome and the insidious foe vanquished. Hope, courage, proper exercise, will-power, and the regular and continuous use of the best nourishing food-medicine in existence—

Scott's Emulsion

—the wasting can be arrested, the lungs healed, the cough cured, bodily energies renewed and the physical powers made to assert themselves and kill the germs that are beginning to find lodgment in the lungs. This renowned preparation, that has no doubt cured hundreds of thousands of incipient cases of Consumption, is simply Cod-liver Oil emulsified and made palatable and easy of assimilation, combined with the Hypophosphites, the great bone, brain and nerve tonic, Scott & Bowne, New York.
